

○ Step1 :- Create Repository

○ Step2 :- Create Folder

Practice:

→ Daily Practice:

The screenshot shows a Mac desktop with a Safari browser window open to a GitHub repository. The repository name is 'Practice'. The left sidebar shows a file tree with a folder named 'Daily practice' containing several text files: 'main', 'Extra practice', 'program1.txt', 'program2.txt', 'file1.txt', 'file2.txt', 'file3.txt', and '.gitattributes'. The main content area displays a commit history for the 'anushree-371' branch. The first commit is a message 'file and program of pratice' made by 'anushree-371' at 'bff0d8d - 1 minute ago'. Below it are three more commits, each with the same message and timestamp ('1 minute ago'). The commit history table has columns for 'Name', 'Last commit message', and 'Last commit date'. The status bar at the bottom of the screen shows various application icons and the date 'Wed Dec 10 1:25 PM'.

→ Extra Practice:

[Practice / Daily practice / Extra practice /](#)

Add file ...

Name	Last commit message	Last commit date
..		
program1.txt	file and program of pratice	2 minutes ago
program2.txt	file and program of pratice	2 minutes ago

STEP3:-

URL::- <https://github.com/anushree-371/Practice.git>
